ENGINEERING WORKS

COMPANY PROFILE

Design & manufacturing & plastic packing material for cosmetics, Pharmaceutical & home care industry

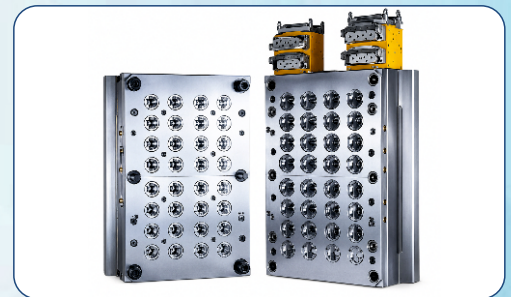

Excel Engineering Works has been in the market since 2006 and deals mainly with plastic injection moulds and production of plastic products and providing service to Indian metro sector, corporate houses, Government sector, etc. Besides, we also deal with development and manufacturing of customized machine parts. We can give you product and services based on your requirements.

Vision:

To be leader in our fields with highest ethical standards that delivers exceptional values for our client with a competitive edge in price, quality & service. Quality proper infrastructure, latest technology & competitive rates make us the leading supplier in our field. Our professional & dedicated manpower can serve you with a wide range of products.

Moulds:

All our moulds are multi-cavity, ranging from 1- 84 cavities, with all inserts interchangeable and hardened up to 50/52 HRC (material- H13, Stavax, SS3216, etc.) Our main plates are also pre-hardened material (P-20) surface treated (anti- corrosion) for rust prevention. In addition, treatments like nitriding are offered on Inserts for better life of moulds. Our balanced cooling and use of materials like beryllium copper also play a significant role in reducing the cycle time.

These processes guarantee our moulds to perform at least a million shots without the need of an overhaul. Customer support is always present to take care of unfrozen circumstances and exigencies.

R&D:

In our R&D Department, new ideas successfully manifest into Pilot and furthermore into Commercial moulds research in improvement of potential is done, as well as realisation of special customer demands. We take up our customer service and Customized consulting on the highest priority basis. This is considered to be our leading principles in the company's philosophy.

Moulding:

Excel Engineering Works is equipped with new generations Milacron Injection moulding machines ranging from 50T to 150T operated by qualified staff & skilled workers and is one of the leading manufacturer and supplier of plastic packaging material catering to various industries - pharmaceuticals, cosmetics, agro-chemicals, laboratories, home care and many more. We specialize in injection moulding, injection blow moulding and extrusion blow moulding to produce plastic packaging material to serve customer needs.

Quality:

Maintaining quality is of upmost importance and we are committed to meet the requirements of the industries we serve. We are an **ISO 9001:2015** certified company.

One of Mumbai's leading and most Professionally managed manufacturing in the field of injection, Mould & Mouldings for the past 20 years providing services to Indian Metro Sector, Corporate Houses, Government Sectors etc.
